ABSTRACT: Project management is a trendy topic in today's business. However, only appropriate and consistent usage ensures the stakeholders and sponsors can get expected benefits and pay offs. The lecture highlights some keystones for successful implementation and use of project management processes, tools and techniques. At the end of the lesson the audience will get also the short overview of top management's near-future expectations on project managers and their skills.

BIO: **Petr Šesták** graduated from the University of Technology in Pilsen in Microelectronics. He worked as a Technical Specialist in miscellaneous positions and managed SI projects. Since 2000 he works at HEWLETT-PACKARD, currently as Senior Programme Manager in Public Practice of EDS Apps Division. He specialises in Enterprise Architecture and Business Solutions Consulting. His track record contains many won prospects followed by multimillion \$ delivery. He speaks at project and financial management conferences and leads PM seminars. He is a member of Project Management Institute and a sponsor of PMI Czech Republic Chapter. He was awarded the Project Management Professional certification. He always remembers to have fun while working.

TECHNICAL SPONSORSHIP: JOINT CAS, COM AND SP CHAPTER OF IEEE CZECHOSLOVAKIA SECTION.
